**Trust us, it's been tested.\***

\*Utah State University. Ask us for the test report.

**BEST FLOW IN THE INDUSTRY.**

Size	Traditional Y Strainer	LPD Y Strainer
NPS	Cv	Cv
2	70	120
2-1/2	110	165
3	150	236
4	270	460
5	390	641
6	580	952
8	920	1580
10	1600	2424
12	2200	3576

Cv - The industry standard method to compare flow through products.

Cv equals the number of GPM that will flow through the strainer at 1 psi of pressure drop.

LOWER PRESSURE DROP WILL  
REDUCE OVERALL PUMP  
HEAD AND MOTOR BHP,  
WHICH WILL CONTRIBUTE  
TO INCREASED LEED POINTS

**Blow Down Port**

# THE COMPETITION DOES NOT MEASURE UP!

4" Competitor

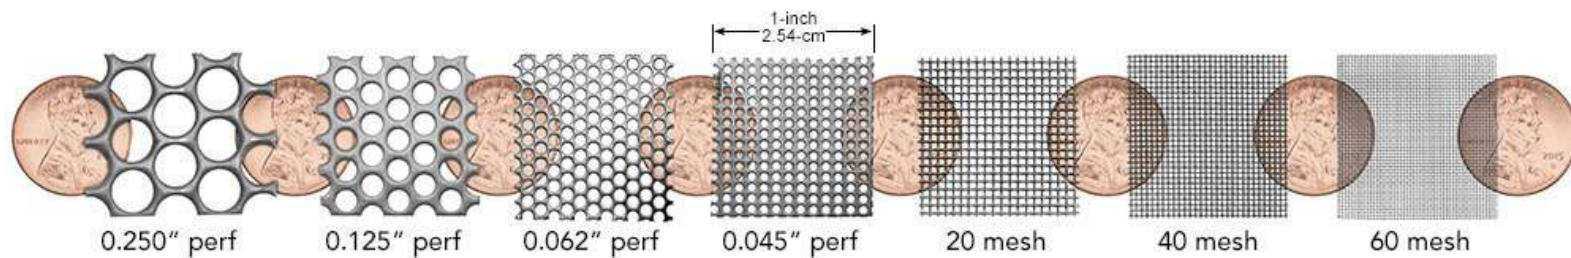

4" LPD

LARGER SCREENS WITH MORE SURFACE AREA

Clogging/Blockage - When comparing competitors literature to the LPD be sure to compare square areas!

20% blockage of the LPD does not equal 20% of our competitors square area.
